

SMART ZERO

Carbon accounting, energy management and reporting, all in one place.

Smart has partnered with [NetNada](#) to bring you world-leading **carbon accounting** software, tailored to your business's reporting needs.

Whether you're voluntarily tracking emissions or meeting new compliance requirements, our flexible platform lets you pay for only what you need.

It seamlessly integrates with your accounting software, making it simple to calculate, publish, and track your Scope 1, 2, and 3 emissions—all in a user-friendly dashboard.

So you can tackle carbon reporting with ease, the Smart way.

"Smart Zero carbon accounting offers an exciting opportunity to track system performance at a site and portfolio level, but it'll also serve many other masters in terms of our annual reporting that we have to now do, and the wider prospect of sustainability reporting."

JULIAN FREELAND
ESG MANAGER, VENTORA GROUP
